

U. S. Fish and Wildlife Service

Emergency Designation of an Additional Federal Manatee Protection Area in Lee County Frequently Asked Questions

Updated April 6, 2004

Q1: Why are you designating emergency manatee protection areas at this time?

A1: The Service has decided to implement this emergency rule after carefully assessing:

- the impacts the recent State court rulings and decisions have had on manatee protection, and
- the best available information for evaluating interactions between manatees and humans at these five sites.

The Service believes that since these areas are currently not protected, this emergency designation is needed to protect manatees from imminent take.

Q2: What is your legal authority to establish manatee refuges?

A2: The authority to establish protection areas for the Florida manatee is provided by the *Endangered Species Act* and the *Marine Mammal Protection Act*. The Service may establish manatee protection areas, also known as sanctuaries or refuges, whenever there is substantial evidence showing that these areas are necessary to prevent take of one or more manatees.

Q3: Will the public have an opportunity to participate in the emergency designation process?

A3: No. Under an emergency designation, the process is expedited because there is clearly an immediate danger to a listed species.

However, the public will have an opportunity to comment on the concurrent proposal to make the emergency designation permanent, which will be published shortly.

Q4: Why does the Service intend to make these emergency designations permanent?

A4: Regulations require the Service to initiate the process to make these Federal designations permanent within 10 days of publishing the Emergency Designation rule. We plan to publish a proposed rule to make this designation permanent in the near future. There will be an opportunity for Stakeholders and the general public to provide comment on the proposal. Once that process is complete, the Service will then issue its final decision. If the State or local government re-instates the protection zones, the Service will consider withdrawing its proposal.

Q5: As the result of this emergency designation, will the Service re-evaluate permits in Lee County that were previously denied by the U.S. Army Corps of Engineers because of inadequate protection for the manatee?

A5: Yes. When these manatee protection areas are in place and when adequate law enforcement is underway, the Service will re-evaluate the permits.

Q6: What will the Service do if the State is successful in appealing the lower State court's ruling? What will the Service do if the State eventually re-designates its previous manatee protection zones? What if the county takes similar action?

A6: If any of these scenarios occurs, the Service will consider withdrawing its Federal designation of the five areas as a Federal manatee refuge.

Q7: When will the emergency designation take effect?

A7: The Federal emergency designation is effective immediately.

Q8: How will the areas be marked?

A8: The signs designating the former State zones are being updated to reflect the new Federal designation. Additional signs may be put in place to better delineate the Federal refuge if the emergency designation becomes permanent.

Q9: What about state exemption holders such as commercial fishermen and fishing guides?

A9: There are no provisions for allowing these exemptions under Federal law. Business and individuals previously holding State exemptions in these areas should be aware that they are not valid in the Federal zones. This is the only difference between the Federal designation and the previous State designation.

Q10: What are the next steps in the process?

A10: The Service will propose a permanent manatee refuge designation in these five areas. Then it will have a public comment period and assess these comments before making a final decision.

Q11: Where is the Federal manatee refuge located?

A11: The areas affected by this emergency designation are in Lee County, in the vicinity of Matlacha Pass, Estero Bay, southwest side of Pine Island, eastern San Carlos Bay and the mouth of the Caloosahatchee River. These areas correspond exactly to the previous manatee protection zones established by the State of Florida.

A highly detailed description of the boundaries of the Pine Island-Estero Bay Manatee Refuge can be found in today's *Federal Register*. It is also available at the Service's web site: northflorida.fws.gov.

The regulation and additional information on this action is available on the Service's web site at northflorida.fws.gov, or may be requested by writing via e-mail to manatee@fws.gov; by faxing your request to 904-232-2404; or by letter to USFWS, Attn: MPA Emergency Designation, 6620 Southpoint Dr. S, Suite 310, Jacksonville, FL 32216. If you have specific questions or need special assistance, please contact the Service's North Florida Field Office at 904-232-2580, ext. 109.

Q12: The State 2nd Judicial Circuit Court did not invalidate the State's restrictions of 25-mph in the channels. Why are these areas included in the Service's emergency designation?

A12: Encompassing all the areas, including the channels, will make it easier to post and less confusing to the boating public.

Q13: How is "slow" speed defined in these regulated areas?

A13: "Slow" speed is defined as the speed at which the watercraft proceeds fully off plane and is completely settled in the water. Since watercraft of different sizes and configurations may travel at

different speeds, a specific speed is not assigned. However, a watercraft is NOT proceeding at slow speed if it is - 1) on plane, (2) in the process of coming up on or coming off of plane, or (3) is creating an excessive wake. A watercraft IS proceeding at slow speed if it is fully off plane and completely settled in the water, not plowing or creating an excessive wake. Protection areas may also carry a channel qualifier, exempt or included. In such instances this refers to the existing marked navigational channel.

Q14: What is a manatee refuge?

A14: Manatee refuges are areas where **certain** waterborne activities may be restricted or prohibited to prevent injuring or killing one or more manatees. Waterborne activities that may be restricted include, but are not limited to, swimming, diving (including skin and SCUBA diving), snorkeling, water skiing, surfing, fishing, the use of water vehicles, and dredging and filling operations. For an area designated as a manatee refuge, the regulation will state which, if any, waterborne activities are prohibited, and state the applicable restrictions. Designation of manatee refuges will not eliminate waterway property owner access rights. Public and private property owners and their designees would be permitted watercraft access and allowed to maintain property and waterways when their property is located in a manatee sanctuary or refuge. Any authorized boating activity in the refuges would be conducted by operating watercraft at slow speed and maintenance activities would be allowed, subject to any Federal, State or local permitting requirements.

Q15: What is “take”?

A15: “Take”, as defined by the Endangered Species Act, means “to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, collect, or attempt to engage in any such conduct.”

- The Service defines “harass” as actions that create the likelihood of injury to listed species to such an extent as to significantly disrupt normal behavior patterns which include, but are not limited to, breeding, feeding or sheltering.
- The Service defines “harm” to include significant habitat modification or degradation that actually results in death or injury to listed species by significantly impairing behavioral patterns such as breeding, feeding or sheltering.

Manatees also receive Federal protection under the Marine Mammal Protection Act, which is administered by the National Oceanic and Atmospheric Administration, or NOAA. This act has similar definitions of take and harassment.

Q16: Will this emergency designation of a manatee protection area affect property rights?

A16: No. Designation of manatee refuges will not eliminate access rights for property owners on waterways. Public and private property owners and their designees would be permitted watercraft access. They could also maintain their property and its waterways if the property becomes part of a manatee refuge. Any authorized boating would be conducted at slow speed in the refuge area, as posted.

Q17: Will designation of a site as a manatee refuge restrict my access to Florida’s waterways?

A17: Manatee protection areas are not intended to create blanket access restrictions to Florida’s waterways. However, there would be some level of impact. The types of prohibited or restricted waterborne activities and the schedules for them will vary from site to site, and may be seasonal in nature. In all cases, manatee refuges will not eliminate waterway property owner access rights.

Q18: Do you consider economic and quality-of-life impacts on citizens when making final site selection?

A18: Yes. The Service considers waterway access, impact on commercial and recreational waterway uses, as well as community economic impacts in reaching final decisions. Under the emergency designation process, these factors can be considered as long as the basic purpose of the emergency site designations – reducing or eliminating the take of manatees – is achieved.

Q19: Are you singling out watercraft as the only cause of manatee mortality?

A19: No. The Service acknowledges that watercraft-related mortality is not the only cause of manatee deaths. It is, however, the number one cause of human-related manatee deaths. Manatee protection areas offer us an opportunity to implement sound, effective risk-reduction management actions. Adult survival rates are one of the key criteria the Service considers in evaluating the success of recovery efforts. Establishing these protection areas is expected to have a significant impact on overall adult manatee survival rates.

Q20: Does the Fish and Wildlife Service have enough people to post and enforce these areas?

A20: Yes. The Service is committed to posting and enforcing any manatee protection area that it designates. In addition, the State has also committed to increasing its law enforcement efforts for manatee protection.
